

In Memory of Vincent Pescatore

Vincent and Zulena Pescatore with family and as a young couple

Dear Vincent,

We are proud to dedicate to your memory our National Plan for comprehensive eye care across Guatemala.

The plane crash that took your life in 1996 at age 35 on your way to build a second orphanage in neighboring Honduras left us heartbroken.

But we have kept that promise we made to each other in the rainforest - to somehow find a way to cure all preventable blindness in Guatemala.

Our humble thanks for your first call to Vision for the Poor that brought us all together, opened our eyes to immeasurable suffering, inspired the creation of Visualiza, and set us on this path.

We are almost there!
